Subject: Preview: College of Technology - Transition to UH at Sugar Land

UNIVERSITY of HOUSTON

COLLEGE of TECHNOLOGY

Hello, Friends,

It seems as if our spring semester just started and already we are looking forward to our commencement.

It has been a busy semester.

Top on our list is our College's plan to continue our move to the Sugar Land Instructional Site by 2025. To that end, in January we convened a task force of people from our college and our UH at Sugar Land leadership to craft and implement a plan for a smooth transition from the main campus to UH at Sugar Land where several of our programs and classes already live. These bi-monthly meetings have been crucial as we consider moving labs, finding office and classroom spaces, and communicating to our students, faculty and staff. Transparency is our goal. To that end we have created a website (<https://www.uh.edu/technology/sugarland/cot-transition-uhsugarland/>) where we continually update the information and plans of the task force. I invite you to visit the website and keep up to date with our move.

Part of our move includes the construction of a new building adjacent to our current Technology Building in Sugar Land. We are growing, and this growth will feed the growth of a thriving community. These are exciting times.

Let's stay in touch.

Best regards,

Tony

Anthony P Ambler

Dean, College of Technology

Director, BTI Institute
