

UNIVERSITYof **HOUSTON**

Dear Friends,

As hot as the weather has been, we hope that you have managed to find some time of respite to care for yourself. Our summer has gone by very quickly, and soon we will be welcoming a new fall semester.

This summer, the Transition Task Force has been busy identifying and securing classroom and lab space for those programs scheduled to be in Sugar Land this fall. Those are Computer Information Systems (CIS) and Mechanical Engineering Technology (MET), specifically, 2000-level CIS sections and MET sections 1330, 1364, 2354, and 3360. You can see the timeline for courses to move to Sugar Land at the College's Transition to Sugar Land [webpage](#).

Students and their families have questions about our move. Please review the FAQs on the webpage and refer inquiries there.

The College of Technology Building soon will house its own C-store. Avenue C is scheduled to open this fall featuring sandwiches, snacks, and beverages in a cashierless experience.

Additionally, we are in discussions for the new College of Technology Building (SAB2) and should have information regarding design and groundbreaking soon.

As always, we welcome your questions and comments to cotinsugarland@uh.edu. We read and respond to all emails.

Thank you for your continued hard work and support

Dr. Anthony Ambler
Dean, College of Technology

Dr. Jay Neal
Associate Vice President, UH at Sugar Land
