

Student Professional Development and Continuous Learning Efforts RECORD

In recognition for professional development and continuous learning effort the Petroleum Technology Initiative (PTI) is encouraging students to keep personal record of the events attended during their course of study at the University of Houston.

Date/ Time	Event Title/ Host of the Event	Location	Number of hours	Registration number and Host Rep. Signature	PTI Approval

Events, such as Energy Industry related professional meeting - presentations, workshops, in-company camps and /or incompany visits have to be conducted by PTI, academia and/or industry subject matter experts, professional societies and organizations, and their UH student chapters - PTI partners. (No golf and/ or poker tournaments, please)

To keep your Record: Fill the information about the event and ask hosting group/ company representative to sign the appropriate line in the list.

Many University of Houston professors encourage students to attend such events and give their students extra points for the class at the end of semester. If other requirements are met, the PTI will recognize earned professional development hours (at least 10) for the Petroleum Technology Certificate award.
